PROFESSIONAL EXPERIENCE

Application Developer

May 2025 – May 2026

Gameplay Inc

California, USA

- Engineered scalable AI features and modular UI components using .NET MVC and PostgreSQL, reducing client-side rendering latency by **18%** and scaling the platform to handle enterprise-level traffic.
- Optimized complex relational database queries and indexing strategies in PostgreSQL, achieving a **20% performance boost** across critical analytical endpoints.
- Led automated testing initiatives and code reviews within a cross-functional team, catching 15+ critical edge-case bugs and boosting test coverage by **12%**.

Data Analyst

March 2022 – July 2024

Weagile Software Solutions

Maharashtra, India

- Designed end-to-end data visualization pipelines and analytical dashboards, processing high-volume behavioral metrics to deliver real-time operational insights for business stakeholders.
- Built LLM-driven automation scripts using few-shot and chain-of-thought prompting to accelerate analytical pipeline velocity and automate dashboard updates.
- Streamlined asynchronous ETL data workflows, reducing manual reporting cycles by **40%** while maintaining strict data validation against upstream production databases.

EDUCATION

Purdue University

Indiana, USA

Master of Science in Computer Science

August 2024 – May 2026

Advanced Algorithms, Distributed Systems, Machine Learning, Software Engineering, Cloud Computing

University of Pune

Maharashtra, India

Bachelor of Technology in Computer Science

August 2020 – July 2024

Data Structures and Algorithms, Database Management Systems, Object Oriented Programming

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, C++, C#, SQL, HTML/CSS, PHP

Frameworks & Libraries: React, Next.js, Node.js, Express, Django, FastAPI, Spring Boot, .NET / ASP.NET

AI/ML & Data: PyTorch, TensorFlow, scikit-learn, NumPy, pandas, LLM Frameworks & RAG, Prompt Engineering, Computer Vision, Time Series Forecasting

Agentic AI: LangChain, LangGraph, MCP (Model Context Protocol), Vector Databases (Pinecone, Weaviate, pgvector)

Databases: PostgreSQL, MySQL, MongoDB, Graph Databases

Cloud & DevOps: AWS (Lambda, API Gateway), Google Cloud, Azure, Docker, Kubernetes, Terraform, CI/CD, Git, REST APIs

Testing & Monitoring: Jest, Pytest, Cypress, Datadog, Grafana, CloudWatch, OAuth 2.0

Data & Analytics Tools: Tableau, Power BI, Excel, A/B Testing, ETL Pipelines, JIRA, Bitbucket

KEY PROJECTS

Fibucks | [fibucks.com](#)

Aug – Feb 2025

Next.js, TypeScript, MongoDB, Node.js, JWT, Chart.js, Spring Boot, Azure

- Built and deployed a full-stack personal finance platform with Node.js and Spring Boot microservices behind a responsive Next.js dashboard on Azure.
- Secured user sessions with JWT authentication and layered client/server-side validation, achieving **100% data isolation** and closing standard OWASP vulnerabilities.
- Shipped an AI financial advisor feature using RAG and semantic search over transaction history to surface predictive overspending alerts.

Autonomous Drone Swarm Systems

Jan – Dec 2024

Independent Project & IAF-Partnered Initiative | Python, ROS, OpenCV, C++, Raspberry Pi

- Built decentralized swarm coordination logic for a fleet of 50+ autonomous drones, enabling edge-computed mesh synchronization and real-time collision avoidance.
- Deployed real-time computer vision on Raspberry Pi hardware for simultaneous localization, dynamic mapping, and threat detection.
- Co-led a mission-critical extension of the system in partnership with the Indian Air Force, ranking in the **top 1% nationally** and earning a formal Appreciation Letter from an IAF Squadron Leader.
- Named National Grand Finalist in a defense-applicable technology hackathon for autonomous flight logic and distributed fault-tolerant design.

Real-Time Audio-Enabled Object Detection System

Jan – Dec 2024

Python, YOLOv8, NLP, Gemini API

- Built a real-time object detection pipeline with YOLOv8, reaching **98% accuracy** across cluttered, real-world test environments.
- Added voice-based NLP interaction via the Gemini API to deliver spoken object feedback, supporting assistive-technology use cases for visually impaired users.
- Co-authored a peer-reviewed paper on the system's edge processing and signal parsing models, published in IJSREM (DOI: 10.55041/IJSREM29989).

HONORS & LEADERSHIP

National Grand Finalist, Smart India Hackathon: Selected out of thousands of applicants nationwide for top-tier execution in physical hardware system prototyping and autonomous algorithm delivery (Hardware Edition).

Formal Appreciation Letter, Indian Air Force: Recognized by an IAF Squadron Leader for engineering execution on a mission-critical autonomous drone initiative.

Technical Team Volunteer Lead: Handled system logistics and localized network setup support for Helping Hearts NGO.
